## CERAKOTE CERAMIC COATING

Cerakote is a durable ceramic coating that has been used industrially for many years. It will give your sink an additional coating that is impervious to industrial cleaners. While we still suggest a coat of wax applied monthly, this process will make your Bates & Bates sink not only beautiful, but functional as well! Please contact your local Bates & Bates dealer for more information and pricing. Pictured below is a B0914P.PB (unlacquered brass) sink with a clear cerakote coating.
